

RESILIENT Coastal Wetlands
Coastal Communities

Multi-Regional Workshop

Thank you for participating in the workshop!

We welcome your feedback.

OBJECTIVES

To exchange scientific perspectives and feedback on:

- Coastal wetlands vulnerability and resilience
- Application of resilience-based management
- Implications for coastal community resilience

GOAL: Leverage knowledge and lessons learned from across regions and organizations to help standardize, improve, and advance methods to support resilient coastal wetlands and communities

- Whether our rankings of the topics/challenges according to interest/importance changed
- Where we stand on achieving resilient coastal wetlands and communities, and how to improve
- Whether the information needed to manage for resilience is available and sufficient for success
- Aspects of managing for resilience that could be more standardized versus more tailored
- How our different organizations can coordinate better for filling gaps and sharing lessons
- What is most important to improve for environmental justice

HOW WILL YOUR FEEDBACK BE USED?

Workshop Proceedings with summaries, lessons learned, and discussion of synthetic conclusions, may include (but is not limited to):

- Links to presentations
- Discussion notes
- Lessons learned about challenges
- State of the science: knowledge, resources, gaps
- Emerging principles for better standardization
- Ideas for collaboration

Workshop website

- <https://resilience-workshop.tetrattech.com/agenda>
- Recordings and PPTs will be posted in about 2 weeks
- Speaker bios and other workshop resources are posted
- Speakers will be invited to submit links to resources for website posting

Multi-Regional Workshop

Home

May 24-25, 2022 @ 11am-4pm daily
Online via Teams

This workshop website includes the agenda, speaker bios, and other workshop resources. Please check back for updates! If you have any questions, please send an email to ResilienceWkshp@tetrattech.com.

The goal of this workshop is to leverage knowledge and lessons learned from across regions and organizations to help standardize, improve, and advance methods to support resilient coastal wetlands and communities.

Our objectives are to share scientific perspectives and feedback on:

- Coastal wetlands vulnerability and resilience

Thank you!
